Math 480, Spring 2016

Introduction to actuarial science

Syllabus

Instructor: Dr. Xin Dang
Office: Hume 315
Office hours: T Th 8:00 am -- 10:00 am or by appointment
Phone: 662-915-7409
Email: xdang@olemiss.edu

Course contents and goals: This course is to develop knowledge of the fundamental probability tools for quantitatively assessing risk with emphasis on the application of these tools to problems encountered in actuarial science. The course introduces concepts on general probability, univariate distributions, multivariate distributions and risk management. The techniques and skills for applying those concepts to solve problems will be emphasized. This course will be helpful for students to prepare for Exam P or Exam 1 jointly administrated by SOA and CAS.

Recommended: ACTEX Study Manual for Exam P/1, by S. Borverman

Grading Policy:
1. Homework will be assigned weekly but not collected and graded. Some solutions will be provided.
2. Quizzes count total 200 points.
3. The midterm exam counts 100 points.
4. The final examination is comprehensive and counts 200 points.

Final Grade: The cumulative total points are 500+bonus points.
A: >450,  B+: 425-449,  B: 400-424,  C+: 375-399,  C: 350-374,  D: 300-349
