

Pi Mu Epsilon

the mathematics honors society for university students

**Thursday, March 2nd, 2017
12:15-12:50 PM in Hume 101**

Dr. Rachna Prakash

Where Business Meets Mathematics

In this talk I will discuss various applications of math in business with a focus on how math is applied in the discipline of accountancy. Starting with a brief introduction on the historic links between accountancy and math, I will discuss how ubiquitous math is in different fields of business. I will end with an example of how math is used in accounting research with a brief discussion of my research on climate change.
